Education

D.G. Ruparel College, Mumbai **June 2023 – April 2026**
Bachelor of Science in Information Technology (BSc IT) *CGPI: 6.83*

Work Experience

Marcos Quay Sporting Excellence Pvt Ltd **Jul 2026 – Oct 2026**
Full-Stack Developer Intern *Mumbai, India*

- **Led the Human Resources Management System (HRMS) project as the sole developer**, developing recruitment automation functionality to enable HR to manage hiring workflows and track candidates throughout the recruitment process.
- Contributed to the company's main website-to-mobile conversion project, implementing and integrating mobile app features with existing authentication APIs and navigation workflows.
- Developed and maintained full-stack features across **HRMS, Coach, School Management, and administrative platforms** using Vue.js, Node.js, Express.js, MariaDB/MySQL, and REST APIs.
- Resolved **15+ bugs and integration issues** through systematic debugging, SQL analysis, and backend troubleshooting.
- Delivered **PDF generation, email automation, responsive UI improvements, and role-based administrative workflows** across internal applications.

Projects

Afnkit — Express-Inspired HTTP Framework | *TypeScript, Node.js, Docker* **Oct 2026**

- Engineered **Afnkit**, an original Express-inspired HTTP framework in **strict TypeScript** on **Node.js native HTTP APIs** with **zero runtime dependencies**, using a layered **Application / Router / Route / Layer** architecture driven by a single `next()` dispatch closure.
- Implemented **method-aware routing** and ordered **middleware chaining via next()** that runs exactly one handler per call, with **error propagation** for synchronous throws and rejected async handlers and deliberate **404, 405 (with Allow), and 500** responses.
- Built developer-facing **res.status()**, **res.send()**, and **res.json()** helpers with correct content types and per-request **request/response prototype** extension, plus **31 automated tests** authored with Node's built-in `node:test` against real HTTP servers; published on npm as `afnkit@0.1.0` (`npm i afnkit`).

CodeGlow — VS Code Persistent Code Highlighter | *TypeScript, VS Code API* **June 2026**

- Developed a TypeScript VS Code extension providing persistent color-coded code annotations through native **Command Palette** and editor context menu integrations.
- Engineered highlight tracking using serialized range data structures and VS Code event APIs, maintaining annotation accuracy across code edits and undo/redo operations.
- Built a lightweight architecture using the **VS Code Decoration API** with zero backend dependencies and packaged the extension as a production-ready **VSIX build**.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++
Frontend: React, React Native, Next.js, Vue.js, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Database: MySQL, PostgreSQL, Redis
Tools: Git, GitHub, Postman, Burp Suite, Jira, Docker

Certifications

HackerRank SQL (Intermediate) Certification — HackerRank
Docker Essentials: A Developer Introduction — IBM
